

IN THE SPECIFICATION:

Please amend the specification as follows:

Revise the paragraph beginning at line 18 of page 12, as follows:

The vehicle-mounted apparatus according to this embodiment is a box-shaped apparatus having a controlling section for controlling each unit described above, and a main panel 1 mounted vertically on the front surface facing toward the user is shown in Fig. 1, as exemplarily mounted on vehicle dashboard 3. Fig. 8 is a front view of the main panel 1. As shown in these figures, this embodiment comprises a main display (corresponding to the first display) D1 provided in the main panel 1 and a sub panel 2 mounted on the main panel.
